**SOUTHERN CALIFORNIA WEATHER THREAT CONDITIONS:**

**Advisories:** Wind Advisory

**Watches:** None

**Warnings:** None
Unseasonably warm temperatures are expected for the coast and valleys of Los Angeles and Ventura Counties Monday. The combination of weak to moderate Santa Ana Winds and building high pressure aloft will allow for very warm temperatures to occur on Monday. On Tuesday, onshore flow will bring much cooler temperatures to the coastal areas, with a few degrees cooling for the valleys. Temperatures will then return to near or slightly above normal in most places for the remainder of the week. The hot conditions will result in an increased risk of heat-related illnesses, especially for the elderly, infants, outdoor workers and those participating in outdoor activities.
